How can a small team prepare people to use AI on real-world tasks?

For: Paušalni obrt · Obrtnici · j.d.o.o. · d.o.o.

Verified by an official source · Reviewed: 2026-11-22

Applicability: For the scope and roles under Article 4 of the applicable Artificial Intelligence Act.

Article 4 of the Artificial Intelligence Act links literacy to role, technical knowledge, experience and context of use. Develop a brief training programme based on real-world tasks and risks.

When this is applied

Prepare examples of permitted entries, sources for verifying outputs and the individuals responsible for approval. Use the current consolidated text and verify the applicable scope.

What to do in practice

After training on a real-world template, the team should demonstrate which fields are removed, what is checked, and to whom an error is reported.

A business example

Sales uses AI to suggest text, while support checks the address and price against the price list. The training includes various tasks for two roles.

Specific next steps

1. After training on a real-world template, the team should demonstrate which fields are removed, what is checked, and to whom an error is reported.

Limits of application

For the scope and roles under Article 4 of the applicable Artificial Intelligence Act.
