How can we clarify the payment of a bonus that covers two shifts and two periods?

For: Platformski radnik kod poslodavca · Platformski rad preko vlastitog obrta

Practical business guidance · Reviewed: 2026-11-22

Applicability: For comparing income and expenses. Wage calculations and self-employment liabilities should be treated separately.

Compile a timeline of conditions and orders, clearly distinguishing the billing period from the payment date. Then compare the programme conditions with individual orders and billing adjustments.

When this is applied

When submitting an enquiry, please include the campaign conditions, the order number, the dates and the exact amount you are requesting. Do not send any personal data of customers that is not necessary for the enquiry.

What to do in practice

Request that the calculation for the period be specified and save the response with the records.

A business example

The Friday and Saturday bonus is only processed in the following week's pay run. The employee links both records and requests the exact item instead of recalculating the total for the whole month.

Specific next steps

1. Request that the calculation for the period be specified and save the response with the records.

Limits of application

For comparing income and expenses. Wage calculations and self-employment liabilities should be treated separately.
