How can I check whether the EU is funding the digitalisation or development of my application?

For: Paušalni obrt · Obrtnici · j.d.o.o. · d.o.o. · Platformski rad preko vlastitog obrta

Verified by an official source · Reviewed: 2026-11-19

Applicability: According to the currently published instructions, deadlines and conditions of the specific call.

Compare the project with the programme's objective. Digitising your own operations and developing products for the market often require different calls, a level of maturity and proof of the expected impact.

Specific next steps

1. Describe what you are funding, who benefits, the level of development and the costs.

2. In the instructions, verify the eligibility of the business, sole traders, partners, owner's labour, software and external services.

3. Compare and support education, internationalisation or consultancy if the project is not yet ready for the investment call.

Limits of application

EIC Accelerator is an example of an innovation programme with specific criteria. The verification relates to the programme's rules, without any claim to openness or a right to support.
