Comparing two AI suppliers in your own work · How to verify this using an example?

For: Paušalni obrt · Obrtnici · j.d.o.o. · d.o.o.

Practical business guidance · Reviewed: 2026-11-22

Applicability: According to the profile and circumstances of the described case.

Evaluate whether the results are reproducible for exceptions and the Croatian language.

Checking by example

Prepare the same anonymised tasks, quality criteria and total cost for both tools.

Save the model version, settings, inputs, time and the score of each output.

Working example · A comparison of two AI providers in your own work

Keep a record of the model version, settings, inputs, timing and the score of each output. If the tools produce different answers without a source, use verification against the actual document as a benchmark.

Specific next steps

1. Prepare the same anonymised tasks, quality criteria and total cost for both tools.
2. Save the model version, settings, inputs, time and the score of each output.
3. If tools provide different answers without sources, use verification of the actual document as a benchmark.

Limits of application

For the EDIH services available at the local centre and programme.
