AI literacy of business AI users · How to approach it?

For: Paušalni obrt · Obrtnici · j.d.o.o. · d.o.o.

Verified by an official source · Reviewed: 2026-11-22

Applicability: For roles covered by Article 4 of the Artificial Intelligence Act.

Article 4 of the Artificial Intelligence Act requires covered providers and entities that deploy AI systems to take measures to ensure an adequate level of AI literacy for staff and other persons working with the systems on their behalf, depending on the context and experience.

A starting point in practice

Record which roles and systems are covered, the training method, and examples.

Test whether the team differs on the data that may be entered and the outputs that should be checked.

Working example · AI literacy for people using business AI

The team uses AI to draft proposals. At the workshop, they check whether employees can recognise a fictitious price and personal data that must not be uploaded to the tool. They record the training and its specific purpose.

Specific next steps

1. Record which roles and systems are covered, the training method, and examples.
2. Test whether the team differs on the data that may be entered and the outputs that should be checked.
3. Update the training plan whenever a tool with a different purpose or level of risk is introduced.

Limits of application

For roles covered by Article 4 of the Artificial Intelligence Act.
