AI literacy of business AI users · How to verify it with an example?

For: Paušalni obrt · Obrtnici · j.d.o.o. · d.o.o.

Practical business guidance · Reviewed: 2026-11-22

Applicability: According to the profile and circumstances of the described case.

Test whether the team differs on the data that may be entered and the outputs that should be checked.

Checking by example

Article 4 of the Artificial Intelligence Act requires covered providers and entities that deploy AI systems to take measures to ensure an adequate level of AI literacy for staff and other persons working with the systems on their behalf, depending on the context and experience.

Record which roles and systems are covered, the training method, and examples.

Working example · AI literacy for people using business AI

The team uses AI to draft proposals. At the workshop, they check whether employees can recognise a fictitious price and personal data that must not be uploaded to the tool. They record the training and its specific purpose.

Specific next steps

1. Article 4 of the Artificial Intelligence Act requires covered providers and entities that deploy AI systems to take measures to ensure an adequate level of AI literacy for staff and other persons working with the systems on their behalf, depending on the context and experience.
2. Record which roles and systems are covered, the training method, and examples.
3. If generic training does not cover the actual job, add practice in approved scenarios.

Limits of application

For roles covered by Article 4 of the Artificial Intelligence Act.
