Minimum AI output quality for production · What to note?

For: Paušalni obrt · Obrtnici · j.d.o.o. · d.o.o.

Practical business guidance · Reviewed: 2026-11-22

Applicability: According to the profile and circumstances of the described case.

Record the number of corrections, the severity and the source you used to assess the result.

Record and working document

Test critical examples, including contradictory inputs and outdated templates.

If the success rate conceals significant errors, introduce a separate metric to measure their impact.

Working example · Minimum AI output quality for production

Test critical examples, including contradictory inputs and outdated templates.

Specific next steps

1. Test critical examples, including contradictory inputs and outdated templates.
2. If the success rate conceals significant errors, introduce a separate metric to measure their impact.
3. Include the verification rules in the instructions for those who approve the exit.

Limits of application

For the EDIH services available at the local centre and programme.
