AI data extraction from accounts · What if the process gets stuck?

For: Paušalni obrt · Obrtnici · j.d.o.o. · d.o.o.

Practical business guidance · Reviewed: 2026-11-22

Applicability: According to the profile and circumstances of the described case.

When a number is illegible, use manual marking and request a better correction.

When a plan meets an obstacle

Define fields such as amount, currency, reference and supplier with input from an authorised source.

Preserve the link between the extracted data and its original location in the document.

Working example · AI data extraction from invoices

Compare the total amounts to the invoice before sending it to accounting.

Specific next steps

1. Define fields such as amount, currency, reference and supplier with input from an authorised source.
2. Preserve the link between the extracted data and its original location in the document.
3. Agree on a threshold below which the document will not be processed without review.

Limits of application

Apply the guideline to your documents and working methods.
