Testing digital technology before investing · How to go about it?

For: Paušalni obrt · Obrtnici · j.d.o.o. · d.o.o.

Verified by an official source · Reviewed: 2026-11-22

Applicability: For the EDIH services available at the local centre and programme.

The European Commission describes pre-investment testing as one of the services offered by the European Digital Innovation Hubs, providing access to expert knowledge.

A starting point in practice

Prepare a description of the company, the problem, the objective and the investment framework you wish to review.

Check with the specific centre for the service, availability, terms and what you will receive.

Working example · Trialling digital technology before investing

The company is considering automating its incoming mail. Before signing a full-year contract, EDIH asks whether it can test document recognition and manual error checking on a trial sample.

Specific next steps

1. Prepare a description of the company, the problem, the objective and the investment framework you wish to review.
2. Check with the specific centre for the service, availability, terms and what you will receive.
3. Transfer the test conclusions into the decision on the cost and the next pilot.

Limits of application

For the EDIH services available at the local centre and programme.
