Testing digital technology before investing · How to check it using an example?

For: Paušalni obrt · Obrtnici · j.d.o.o. · d.o.o.

Practical business guidance · Reviewed: 2026-11-22

Applicability: According to the profile and circumstances of the described case.

Check with the specific centre for the service, availability, terms and what you will receive.

Checking by example

The European Commission describes pre-investment testing as one of the services offered by the European Digital Innovation Hubs, providing access to expert knowledge.

Prepare a description of the company, the problem, the objective and the investment framework you wish to review.

Working example · Trialling digital technology before investing

The company is considering automating its incoming mail. Before signing a full-year contract, EDIH asks whether it can test document recognition and manual error checking on a trial sample.

Specific next steps

1. The European Commission describes pre-investment testing as one of the services offered by the European Digital Innovation Hubs, providing access to expert knowledge.

2. Prepare a description of the company, the problem, the objective and the investment framework you wish to review.

3. If the chosen centre does not have the required expertise, request a referral to another centre in the network.

Limits of application

For the EDIH services available at the local centre and programme.
