Checking by example

Fina's public access to RGFI provides access to published financial statements, including the balance sheet and the income statement when they are publicly available.

Keep the identity of the reporting entity, the year and the date of retrieval.

Working example · Insight into the company's publicly available reports

The supplier offers an annual contract. The buyer checks the reports for the most recent available years, records the date of inspection and separately requests information on the supplier's ability to deliver today.

Specific next steps

1. Fina's public access to RGFI provides access to published financial statements, including the balance sheet and the income statement when they are publicly available.
2. Keep the identity of the reporting entity, the year and the date of retrieval.
3. A lack of results is not proof of inactivity. Check the coverage and status of the post.

Limits of application

For records available through public inspection in the RGFI.
