# Two consecutive discounts on the same price · How to check this using an example?

For: Paušalni obrt · Obrtnici · j.d.o.o. · d.o.o.

Practical business guidance · Reviewed: 2026-11-22

Applicability: According to the profile and circumstances of the described case.

**For €100, try two 10 per cent discounts and compare them with a 20 per cent discount.**

## Checking by example

Apply the second discount to the base amount remaining after the first.

Save the calculation of the interim price and the final price with the customer type label.

## Working example · Two consecutive discounts on the same price

Save the calculation of the interim price and the final price, tagged with the customer type. Separately, verify the legal rules for displaying prices in consumer discounts.

## Specific next steps

1. Apply the second discount to the base amount remaining after the first.
2. Save the calculation of the interim price and the final price with the customer type label.
3. Separately, check the legal rules on price display for consumer discounts.

## Limits of application

Apply the guideline to your documents and working methods.
