When a plan meets an obstacle

Select one real-world workflow that has measurable latency or errors.

Record the time spent on manual work, the cost of the pilot solution and the number of users.

Working example · Small-scale digitalisation before a larger investment

Test the tool with one team and compare the results before and after.

Specific next steps

1. Select one real-world workflow that has measurable latency or errors.
2. Record the time spent on manual work, the cost of the pilot solution and the number of users.
3. Seek support from your local EDIH for a proof of concept.
