How can we verify what the START system actually covered when the company was established?

For: limited liability company and limited company

Verified by an official source · Reviewed: 2026-11-22

Applicability: For a limited liability company (j.d.o.o.) and optional services for the electronic start-up of business in Croatia.

The scope of the process also depends on the optional requirements selected in START. Compare the successful confirmations for the services actually chosen with the obligations you are handling separately.

When this is applied

Open the application summary and check the status of each requested service. Separate the company registration, tax returns, the relevant registrations and the application for a bank account.

What to do in practice

Organise the certificates by procedure and assign the remaining tasks to the responsible person.

A business example

The entrepreneur opts to register but skips the application for a business current account. After registration, they separately arrange a bank account before their first charge.

Specific next steps

1. Organise the certificates by procedure and assign the remaining tasks to the responsible person.

Limits of application

For a limited liability company (j.d.o.o.) and optional services for the electronic start-up of business in Croatia.
